Name	Variety	Indoor I/Outdoor O	Planting advice	Care	Ready to harvest	Comments
Asparagus	Mary Washington	0	Plant in full sun in a 20 cm deep bed 45 cm apart. Make a 10 cm ridge down the middle of the whole bed and place the crowns on top of the ridge to allow the roots to dangle down. Cover plants with 10 cm of soil. Plants require full sun.	Only harvest in the third year from planting. Discard and compost any plants that produce berries, these are female and are less productive. Cut down and compost foliage in late autumn each year. Keep plants moist and weed free.	May - June	Spears are suitable for freezing.
Asparagus Pea	The winged Pea	0	Plant 5 cm apart in rows 35 cm apart.	Keep weed free and regularly watered. Protect plants from birds by dangling old cd's around the plants. Harvest when the pods are 3 - 4 cm long. Can be grown	June - Aug	To cook top and tail the pods, steam or boil lightly and serve with butter. Also try to avoid supporting the plants with netting as birds and small mammals can get trapped in them.

				without any support. Pick pods regularly		
Aubergine	Early Long Purple 3	1/0	Better for indoor growing 1 plant in a large pot.	Keep moist. When flowers start to appear feed with a high potassium feed ie tomato feed (preferably organic). Usually once a week but check the label instructions	Aug - Oct	Look up a recipe for Baba ganoush.
Basil	Lemon	1/0	Can be grown in a pot on a bright windowsill. Or plant outside 20 cm apart from June.	Water only when the leaves start to wilt and do not let the plants sit in water for too long. Leaves are best picked and used immediate before use. Remove any flowers to prolong picking.	June - Oct	A distinct citrus flavour, delicious torn into salads.

Broad Bean	Bunyards exhibition	0	Plant 30 cm	Provide support	June - Aug	Blanch the podded
			apart in rows	by tying stem to a		beans in boiling

Broccoli	Summer Purple	0	Plant 60 cm apart between plants and rows in a moisture retentive soil. Will tolerate a sunny position.	Keep moist and weed free. Pick young shoots regularly to encourage cropping.	June - Oct	Tender green stems with purple florets. Great flavour.
Butternut squash	Butterfly F1	0	Plant 90 cm apart in a sunny sheltered position. Keep moist and weed free. Alternative plant in a large deep pot.	Keep moist and weed free. These like to ramble so don't plant too close to other veg.	Sept - Nov	Great for roasting!
Cabbage	Greyhound	0	Plant 30 cm apart with 30 - 38 cm between rows	Water regularly and keep weed free. Keep birds away by dangling old cd's around plants. Pick off any caterpillars by hand.	June - Oct	A good source of vitamins A, B and C.

Cabbage	April (Spring)	O	Plant 30 cm apart for larger cabbages or 10 cm apart for spring greens.	Keep moist and weed free. Look out for caterpillars and remove any by hand. Discourage birds by tying old cds to canes around the plants.	July - Sept	A crisp cabbage ideal for coleslaws.
Cape Gooseberry	Golden Berry	I/O	Plant 40 cm apart in a sheltered sunny position once all frosts have passed. Can be grown as 1 plant in 1 large pot. Can be grown in a greenhouse.	Fruit is ripe when the papery husks begin to dry out and can be left on the plant until needed. Keep moist and weed free.	July - Oct	Juicy orange coloured fruits with a fruit cocktail flavour. Lovely used on cakes and desserts.
Cape Gooseberry	Physalis peruviana	O	Plant 30 cm apart in a sheltered sunny position once all frosts have passed. Can be grown as 1 plant in 1 large pot. Can be grown in a greenhouse.	Fruit is ripe when the papery husks begin to dry out and can be left on the plant until needed. Keep moist and weed free.	July - Sept	Excellent for making jams and jellies. Can be used in pies and smoothies too,

Cauliflower	All the Year Round	0	Plant 60 cm	Keep moist and	June - Oct	Large, white curds.
